

Region 9 Curriculum Committee Minutes
June 3, 2008

Filed subject to approval

Attendance

Committee: Lewis, Logie, Pemberton
Administration: Mas, McMorran
Faculty: Detelich, Luzietti, McTague

Mr. Lewis called the meeting to order at 5:05pm.

No members of the public were present to comment.

The minutes of the January 16, 2008, meeting were accepted by a vote of 2-0; Ms. Pemberton abstained as she was not at that meeting. Mr. Logie was at the meeting as a board member but his term on the committee had not yet started.

Recorders Note: due to a lack of a quorum at the January 16th meeting it is now unclear to me that we needed to or can approve those minutes as it was not an official meeting and no action was taken.

The title of the Earth Science course, primarily a 9th grade course, was discussed.

In order that the name of the course more accurately reflect the content of the, now more CAPT aligned, Earth Science course and to facilitate recruitment of Highly Qualified Teachers, the faculty and the administration proposed renaming the course, at all impacted levels, to "Physical Science and Earth Dynamics".

Motion: Pemberton, Logie approved 3-0

The Curriculum Committee recommends to the Region 9 Board of Education that the name of the **Earth Science** course at all levels be changed to **Physical Science and Earth Dynamics**.

The meeting adjourned at 5:25pm.

Respectfully submitted,

Mark Lewis
